IBM Celebrates Women Business Pioneers In Artificial Intelligence

Forty Recipients from Fifteen Different Countries Honored at Inaugural AI Women Leadership Event Hosted by IBM In New York City

Global Event Recognizes AI Achievements to Advance Their Companies Innovation and Growth

Diverse Industries Represented, Including Energy, Financial Services, Telecommunications, Insurance and Public Sector

ARMONK, N.Y., June 11, 2019 /PRNewswire/ -- IBM (NYSE: IBM) today announced the first recipients and list of global women leaders and pioneers in AI for business. The list recognizes and celebrates women across a variety of industries and geographies for pioneering the use of AI to advance their companies in areas such as innovation, growth, and transformation.

IBM will celebrate the honorees during an inaugural recognition event on June 12, 2019 at the IBM Watson Experience Center in New York, New York where the women will share their experiences leading AI initiatives in their organizations. Students from IBM's P-Tech program will attend to hear from these leaders who have applied AI technology in diverse and meaningful ways to help drive business innovation.

To learn more about these stories of AI achievement – and the lessons these outstanding women have learned along the way – visit http://ibm.com/watson/women-leaders-in-ai.

"Artificial Intelligence is poised to drive dramatic advances in every industry," said Michelle Peluso, SVP, Digital Sales & CMO, IBM, who also serves as Leader of IBM's Women's Initiative. "Today, we are sharing the stories of 40 incredible women, who are paving the way forward in how AI is advancing businesses and changing how people work and live. At IBM, we know gender equality is critical and nowhere is this more important than in AI. We hope the stories shared today will encourage many more women to take a leadership role in shaping the future of this important technology."

Ranging in industries from telecommunications and finance to education and entertainment, the women were selected based upon the ways they are using AI as a transformation agent to help drive results for their organizations and the employees and customers they serve.

Notable quotes include:

"I am passionate for change, to transform current conditions and keep evolving – both in my personal and professional life," said Walkiria Schirrmeister Marchetti, CIO, Banco Bradesco. "It's such an honor and great pleasure to be recognized on behalf of Bradesco team efforts for our AI innovation initiatives."

"I am honored to be included in this distinguished group of women who are pioneers in the development and use of AI," said Tanuja Singeetham, Vice President, Marketing, BEHR Paint. "AI gives us a unique opportunity to grow our businesses by helping us offer consumers more personalized recommendations and solutions in a scalable way that respects their privacy. It is an exciting time to be a female in marketing and I hope we are laying the foundation for the future jobs of women tomorrow."

"We are in a transformative period of innovation," said Lorna Russell, Senior Manager, Product Management, BMC Software. "AI will continue to change how we live and work and in my industry, it is changing traditional IT service management into a more intelligent, conversational and predictive service management. On behalf of a much larger team at BMC, I am honored to be recognized as part of that change."

"It is a great pleasure to be given such an honorable opportunity," said Keiko Konno, General Manager, Service Planning & Development Division, BRIDGE International Corp. "The keys to success of our AI project, which supports the company's inside sale business, include having rich data and clear visions enabling us, as a medium-sized company, to further improve customer experience."

"I am proud to be a leader in driving the implementation of AI applications across the Daimler Group," said Sabine Scheunert, Vice President Digital & IT Marketing/Sales, Mercedes-Benz Cars, Daimler AG. "We are sourcing AI opportunities

along the entire value chain to support our daily work and expand our offering to customers through efficiencies and automation. In fact, Ask Mercedes, our AI chatbot, supports around 60,000 phone calls per year, delivering a much easier and streamlined experience for customers."

"It is an honor to be recognized on behalf of Honda R&D Big Data project teams and practitioners for our work with IBM's AI, Watson," said Kyoka Nakagawa, Chief Engineer, Digital Solution Center, Digital Transformation Division, Honda R&D Co., Ltd. "Bringing AI to the real world requires a thoughtful approach of complementing the work of humans. That's what we are good at, and I believe we can bring more joy to the world."

"What I've learned from my decades of experience in implementing new technology is that both the technology and the team supporting the technology are constantly learning," said Sara Hines, Director of Provider Experience & Connectivity, Humana. "It's exciting to be in a field that is always changing and growing, and to be a leader in AI, you have to be comfortable with that evolution and growth."

"It is a great honour to be recognised as one of the women pioneers in AI," said Seema Gaur, Executive VP & Head IT, IFFCO Tokio General Insurance Company. "AI will definitely create a great impact on enhanced customer experience in the days to come."

"The potential impact AI can have is great and the world is more digitally connected than ever before," Kelly Combs, Director, Emerging Technology Risk, KPMG LLP. "But business leaders need to experience the benefits of AI, alongside full transparency around the use of data and process. Creating trust and responsible governance for AI is imperative so that we can create a seamless experience while also trusting the technology."

"With the right data-driven strategy, AI and machine learning can significantly transform businesses to become smarter and more efficient," said Yimei Guo, Managing Director, Global Head of Research Technology, Morgan Stanley. "The key to success will be a close partnership between businesses, data scientists, and technologists—particularly because many solutions require multi-disciplinary expertise."

"It is an honor to be recognized on behalf of Peninsula Regional Medical Center for our work with IBM's artificial intelligence, Watson," said Rachel Cordrey, Pharmacy Supervisor, Peninsula Regional Medical Center. "I am anxious to see healthcare evolve as AI continues to learn and develop."

"It is an honor to be recognized on behalf of all the hard work conducted by Marines in the field of Artificial Intelligence," said Jennifer Edgin, CTO, Deputy Commandant Information, U.S. Marine Corps.
