

1850® Coffee Brand and Farmer Connect to Bring Coffee Lovers and Producers Closer Together Using IBM Blockchain Technology

Brand will be the first in United States to use Thank My Farmer app to make it easy for coffee drinkers to trace their coffee back to its country of origin and learn about efforts to help farmers in coffee-growing regions

ORRVILLE, Ohio July 15, 2020 – 1850® Coffee, a J. M. Smucker Company brand, in partnership with [Farmer Connect](#), is pioneering a new era in coffee transparency through its 100% Colombian Coffee bagged offering. Leveraging IBM's blockchain technology, consumers can now trace their coffee back to its region of origin on a platform designed to help increase traceability, efficiency and fairness in the coffee supply chain.

By easily scanning a QR code on the bag of coffee, their device will route them to the Thank My Farmer website, which provides information about where the coffee was grown, processed and exported, and the location of its roast. They can also learn more about Farmer Connect projects underway to support coffee producers and their families in Colombia such as providing clean drinking water for schools; coffee seedlings for smallholder farms; school supplies for local schools; and sustainable water and agriculture initiatives. This comes at a time when more consumers are taking a purpose-driven approach to their shopping patterns and purchasing products that more closely align with their values. According to the [IBM Institute for Business Value](#), for those who say sustainability is very important, 71% surveyed are willing to pay a premium for sustainable and environmentally responsible brands.

“We know that consumers are increasingly interested in transparency in the supply chains for the products they enjoy and we have been committed to helping promote this as part of our coffee sustainability strategy,” said Joe Stanziano, senior vice president and general manager of coffee at The J. M. Smucker Company. “Our work with Farmer Connect and IBM not only helps connect coffee lovers to the producers who provide their favorite morning drink, it also gives them the opportunity to support these hardworking smallholder farmers and their families.”

The coffee supply chain is complex given that green coffee is produced by more than 25 million smallholder farmers, as opposed to the larger farms that are associated with delivering the majority of other commodities. Through the blockchain platform, consumers can have access to unprecedented transparency and can participate in a global circular economy where consumers can be directly involved in the agricultural communities that produce their food and drink through donations made to farmers and communities.

This transparency is achieved by using blockchain to record data about supply chain events in the coffee's journey; including which beans were used, when they were roasted, ports they were shipped to and beyond. Information about these events is recorded on an immutable ledger, creating increased accountability for coffee producers and their supply chain partners and helping ensure products are what they say they are.

“Working with The J.M. Smucker Company has been a remarkable opportunity to shine a brighter light on the work of the farmers who grow the beans,” said IBM Food Trust general manager Raj Rao. “By combining blockchain and other technologies, we can give coffee drinkers the tools they need to feel connected to the region where their coffee comes from and even support the farmers and local communities through donations that impact local organizations and schools.”

1850 100% Colombian bagged coffee is a bold, yet smooth blend of premium Colombian Arabica beans. It has a lively and full-bodied taste that's unique to Colombian coffee. It's available at Amazon, Meijer and other retailers throughout the United States and Canada.

About The J. M. Smucker Company

Inspired by more than 120 years of business success and five generations of family leadership, The J. M. Smucker Company makes food that people and pets love. The Company's portfolio of 40+ brands, which are found in 90 percent of U.S. homes and countless restaurants, include iconic products consumers have always loved such as Folgers®, Jif® and Milk-Bone® plus new favorites like Café Bustelo®,

Smucker's® Uncrustables® and Rachael Ray® Nutrish®. Over the past two decades, the Company has grown rapidly by thoughtfully acquiring leading and emerging brands, while ensuring the business has a positive impact on its 7,000+ employees, the communities it is a part of and the planet.
