

IBM Boosts Its Hybrid Cloud Consulting Capability with Taos

Second cloud consulting acquisition expands global footprint;
Silicon Valley leader ranked by Gartner as top cloud professional service provider

ARMONK, N.Y., Jan. 14, 2021 /[PRNewswire](#)/ -- IBM (NYSE:[IBM](#)) today announced an agreement to acquire Taos, a leading cloud professional and managed services provider. Today's news further advances IBM's cloud migration and transformation capabilities, an important aspect of its hybrid cloud platform growth strategy.

"Taos adds the deep expertise, public cloud partnerships and innovative solutions needed to drive growth and adoption of IBM's hybrid cloud platform throughout the Americas," said John Granger, Senior Vice President, Cloud Application Innovation and Chief Operating Officer, IBM Global Business Services. "The platform gives enterprises the freedom to choose from multiple providers to best meet their business and IT needs, and we are committed to helping our clients successfully navigate their open hybrid cloud journeys with those providers."

Headquartered in San Jose, California, Taos is one of the largest multi-cloud consulting and managed services firms in North America. The company brings 30 years of experience with leading brands across technology, financial services, healthcare, retail, transportation and education. A leading adopter of public cloud technologies, Taos forged strong partnerships with Amazon Web Services, Google Cloud Platform, and Microsoft Azure to deliver data center migration, platform engineering and hybrid cloud managed services. Taos is recognized as an industry leader and positioned on the Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services.¹

Leading IT industry analysts estimate the market for cloud professional services will exceed \$200 billion by 2024.² IBM's open and flexible approach to advising, building, moving and managing clients' hybrid environments gives enterprises the freedom to choose from multiple providers to best meet their business and IT needs. This acquisition is the latest example of how IBM is expanding the breadth and depth of its hybrid cloud offerings to manage complex integrations – of technologies, people and processes. IBM announced its plans to acquire European cloud consulting leader Nordcloud on December 21, 2020.

"Our laser-like focus on helping clients migrate to the cloud, modernize multi-cloud platforms, and manage hybrid cloud environments over the past several years is a natural fit with IBM Global Business Services," said Hamilton Yu, CEO of Taos. "Our team brings over 300 certifications with leading public clouds to serve clients throughout North America, and we're thrilled to join forces with IBM and tap into its global delivery capabilities."

Financial details were not disclosed. The transaction is subject to customary closing conditions and is expected to close in the first quarter of 2021.
